(Current or previous minor contract jobs available on request)

Kaljaa.com, Dew-Boms L.L.C.

Founder/C.E.O./Lead Developer- Personal Web Venture

Seattle, WA

October 2009 -Present

***Kaljaa is currently down because it is being rebuilt and hopefully a new beta launch will be ready by the end of this June(fingers crossed). I have a Github account with the source code for viewing and I also have a development version that you can play on. For more information visit the link www.Dew-Boms.com/rails .

- Kaljaa is a social network currently being developed that is designed specifically for the Beer industry by utilizing B2B, B2C, and C2C relations
- Kaljaa was temporarily launched in a very successful and well received clinical/beta trial. During that trial, Kaljaa had hundreds of users join that included people from all parts of the industry such as beer drinkers, breweries, beer distributors, restaurants, and critics.
- Kaljaa is mostly built with Ruby on Rails, JavaScript/AJAX, jQuery, HTML(5), and CSS(3).
- Features of Kaljaa that have been built using Ruby on Rails, JavaScript/AJAX, jQuery, MySql, HTML(5), and CSS(3)
 - Blogging
 - Login/Log Out/Validations
 - News Feed System
 - Friend/Relationship System
 - Rating System
 - Trackers
 - Information Centrals
 - Messaging System
 - Calendar/Events System
 - Settings
 - Following/Micro-posts

- Photos/Albums
- Reviews
- Marketing Data
- Comments
- And many more
- Currently building a mobile version and app for Kaljaa with jQuery mobile and AJAX.
- Successfully recruited a development team to program the site. The development team (not including myself) has fluxed anywhere from 3 to 7 programmers pending on what kind of temp programmers we have. At the core there are 3 permanent programmers that are developing the site. ***Currently, due to life right now, I am doing the rebuild mostly by myself and my core programmers chime in when they can.
- Completed a very thorough and in-depth business plan which includes the executive summary, information on the company itself, information on the industry, market analysis, design, competitive analysis, marketing plan, management plan, operating plan, financial plan, and conclusion summarizing the future plan and expectations of the business.
- Developed, designed, and wrote Kaljaa.com's entire design document consisting of several hundreds of pages that describe the entire website and displays the information in such a way to make future expansion of Kaljaa fluid and productive. The design document provides detail of the website's high level design, low level design, database schema, database relations, wire frame designs, graphic designs, description, objectives, goals for each page, link flow charts, link lists, etc.
- Web development methodologies such as Feature Driven Development (FDD), Scrum, and Agile have been researched to help improve our programming environment.
- Filled out and developed proposals and requests such as a request for information(RFI) and request for proposal(RFP) to acquire contract programmers, set up servers, purchase software, and other various services from businesses local and abroad.
- Acquired appropriate business licenses, such as a L.L.C.
- Acquired Federal Employer Identification Number (FEIN) and set up appropriate tax codes.
- Successfully contracted businesses local and abroad to produce and finish certain aspects of the website, with both sides being mutually pleased with the performance and communications.
- Applied for and successfully received a copyright© for the website through the United States Copyright Office, and currently working on a trademark.
- Successfully set up Business Bank accounts with PNC bank and established appropriate credit lines. Successfully set up the ability for Dew-Boms, L.L.C. to accept credit cards through First Data Global Gateway API in junction with PNC.
- Initiated, developed, and maintained professional relationships with managers, owners, and employees of breweries, The Brewers Association, Silicon Valley Web Hosting(now NephoScale), suppliers, and many other important business contacts.
- Used Adobe products such as Photoshop and Microsoft Visio to develop and design Kaljaa.com

US Department of Agriculture, Natural Resources Conservation Service, National Finance Center, National Science Foundation, and Departmental Management Federal HR Assistant/Specialist at YRCI

Fairfax, VA
